service

1-3 tonnes

Perfect for small maintenance applications.

Key features

The smallest multi-tyre roller available. Compact and manoeuvrable, boasting small turning circles for ease of operation. The compaction and kneading effect of the tyres produces excellent sealing results. Easily transported on a trailer or tilt tray.

Applications

Ideal for compacting asphalt and granular soils or gravels. Best for applications with limited space such as parking areas, driveways and other urban or inner city applications.

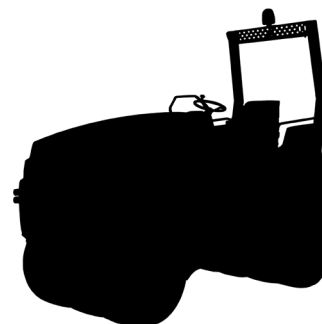

Operating Weight:	Overall Width:	Overall Height:	Overall Length:	Rolling Width:
1550 – 2900 kg	1115 – 1300 mm	2400 – 2700 mm	1970 – 2675 mm	1000 – 1310 mm

3-4 tonnes

For small to medium-sized jobs including preparation of sub bases or asphalt repair work.

Key features

Our 3-4 tonne rollers are compact and manoeuvrable, yet large enough to keep up with production on site. Comes with a pressurised water sprinkler system and mats to help clean the tyres. Can be easily transported on a tilt tray.

Applications

Ideal for compacting asphalt and granular soils or gravels. Best for small to medium-sized jobs including road construction, parking areas or driveways and other urban or inner city applications.

Operating Weight:	Overall Width:	Overall Height:	Overall Length:	Rolling Width:
3285 – 3660 kg	1300 – 1300 mm	2387 – 2750 mm	2675 – 3150 mm	1276 – 1530 mm

5-12 tonnes

A great allrounder for a huge range of mid-sized jobs.

Key features

These machines give great compaction performance, expertly balancing power and mobility to help you get your jobs done efficiently. Comes with a pressurised water sprinkler system and mats to help keep the tyres clean. Adjustable water ballast to suit most applications and weight requirements.

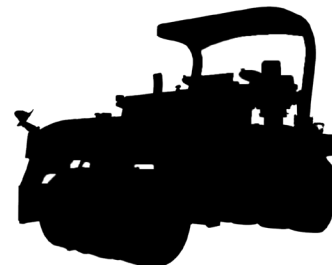

Applications

Great for compacting sub grades, road base and asphalt finishes. Ideal for road maintenance and construction on small to medium-sized civil projects.

Operating Weight:	Overall Width:	Overall Height:	Overall Length:	Rolling Width:
5000 – 12640 kg	1743 – 1980 mm	3200 – 3350 mm	3885 – 4290 mm	1725 – 1743 mm

9-10 tonnes (vibrating)

A vibrating multi suitable for a large range of applications.

Key features

This impressive machine boasts added vibration capabilities for more difficult surfaces or deeper lifts. The unique dynamic kneading action produces uniform compaction results. It's extremely manoeuvrable in tight spaces like city streets, parking lots and cul-de-sacs. Comes with a pressurised water sprinkler system and mats to help keep the tyres clean. Air-conditioned cabins available on selected units. Reduced transport costs compared to heavier static rollers with similar compaction output.

Applications

Great for compacting sub grades, road base and asphalt finishes. Versatile on both large and small projects including hot mix asphalt, aggregate base and warm and cold mixes. Ideal for road maintenance and construction for medium to large civil projects.

Operating Weight:	Overall Width:	Overall Height:	Overall Length:	Rolling Width:
9240 – 9500	2200 mm	3240 – 3317 mm	4540 mm	1950 mm

12-18 tonnes

A great allrounder, suitable for large projects.

Key features

These models are available with an air-on-the-run system to adjust ground contact pressures while you work, and a spacious air-conditioned cabin for operator comfort. Comes with a pressurised water sprinkler system with a large holding tank, and heavy-duty tyre scrapers on all wheels.

Applications

Great for compacting sub grades, road base and asphalt finishes including preparation and application of asphalt, spray seals and some stabilisation projects. Ideal for road maintenance and construction, such as large civil projects or local highways.

Operating Weight:
12000 – 18000 kg

Overall Width:
2042 – 2275 mm

Overall Height:
2905 – 3300 mm

Overall Length:
4290 – 4985 mm

Rolling Width:
2084 – 2275 mm

18-24 tonnes

For when you need to keep up with production.

Key features

These models are available with an air-on-the-run system to adjust ground contact pressures while you work, and a spacious air-conditioned cabin for operator comfort. Comes with a pressurised water sprinkler system with a large holding tank and mats to help clean the tyres, plus heavy-duty tyre scrapers on all wheels.

Applications

Compaction and stabilisation of sub grades, road base and asphalt finishes. Ideal for road maintenance and construction for major projects including highway and freeway applications.

Operating Weight:
18500 – 24000 kg

Overall Width:
2100 – 2420 mm

Overall Height:
3000 – 3310 mm

Overall Length:
4775 – 5040 mm

Rolling Width:
1986 – 2040 mm

40 tonnes

A production beast suitable for the major projects

Key features

This model features a spacious air-conditioned cabin for operator comfort. Water ballast up to 40t thanks to large holding tank. Heavy-duty tyre scrapers on all wheels.

Applications

Specially designed to provide deep-lift compaction for hardstands, earth fills and sub-bases. Perfect for use on large infrastructure projects, highways and major arterials. . These machines have the tonnage required on each wheel to complete airport runway construction and maintenance.

Operating Weight:
40000 kg

Overall Width:
2460 mm

Overall Height:
4130 mm

Overall Length:
6430 mm

Rolling Width:
2160 mm
