CCC/CCC-A Navigator

Digitized asphalt road-building with the Völkel Navigator

Völkel Navigator – one for all

Digitized road-building - simple, effective and efficient

Use this package to set up machines as needed and to adapt your fleet to suit requirements.

All-in-one: Transparency, analysis, remote maintenance and documentation.

One system for all machines

- Navigator kit use flexibly and to suit requirements
- networking of all machines via the Cloud

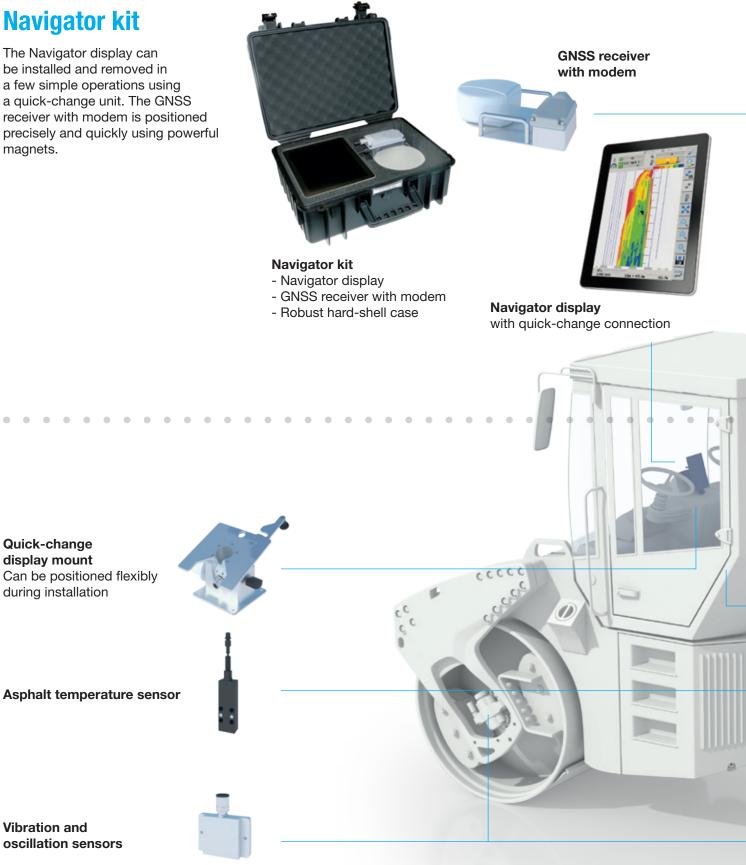

- Fleet set-up independent of manufacturer and machine
- can be retrofitted without any problem
- can be extended in a modular fashion

Clear separation of set-up package and Navigator kit

Navigator kit

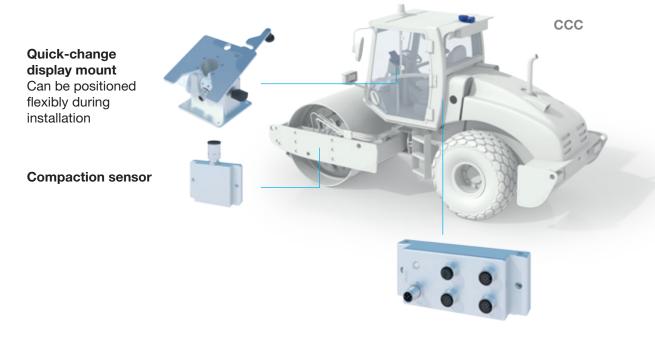

The Navigator display can be installed and removed in a few simple operations using a quick-change unit. The GNSS receiver with modem is positioned precisely and quickly using powerful magnets.

Vibration and

Quick-change display mount

during installation

Intelligent node

Set-up package

The set-up package includes all permanently installed parts and can be installed on any desired machine, irrespective of the manufacturer of the vehicle. Machine-specific settings are saved in the intelligent node.

Intelligent node
